I presume "Open 90" was meant to be "OPA 90."

Subject: FW: assets

NOAA is scoping what assets could be used for a second survey this fall of Ocean Disposal Site #2. We have not discussed funding other than my comment back to the Admiral that we would tee that question up to the senior managers participating in the participating agency group.

My inclination would be that it is premature to have NOAA head down these funding paths but I am not familiar with how these funding sources might work, their applicability and the implications of heading down these paths.

What are your thoughts?

Thx
John

Subject: assets

Hi John,

We are working on some Navy UUV, ROV and ship assets as survey options. What are your thoughts on using Open 90 and the National pollution response fund? I don't know much about it but it came up today. I meet with USCG leadership Monday (I will be at a graduation Monday at the USCG Academy) and Navy NUWC Tuesday. I plan to bring up the project and possible need for survey assets to both to query for options. If there is an option for the USCG to ask the Navy for support via Open 90 would you want me to ask? I can also just continue in an asset data gathering phase and not discuss tasking options at all. I can talk tomorrow if you think it would be useful.

Nancy
